

Bahjat
GROUP

Иранские продукты и сладости
Iranian products and sweets

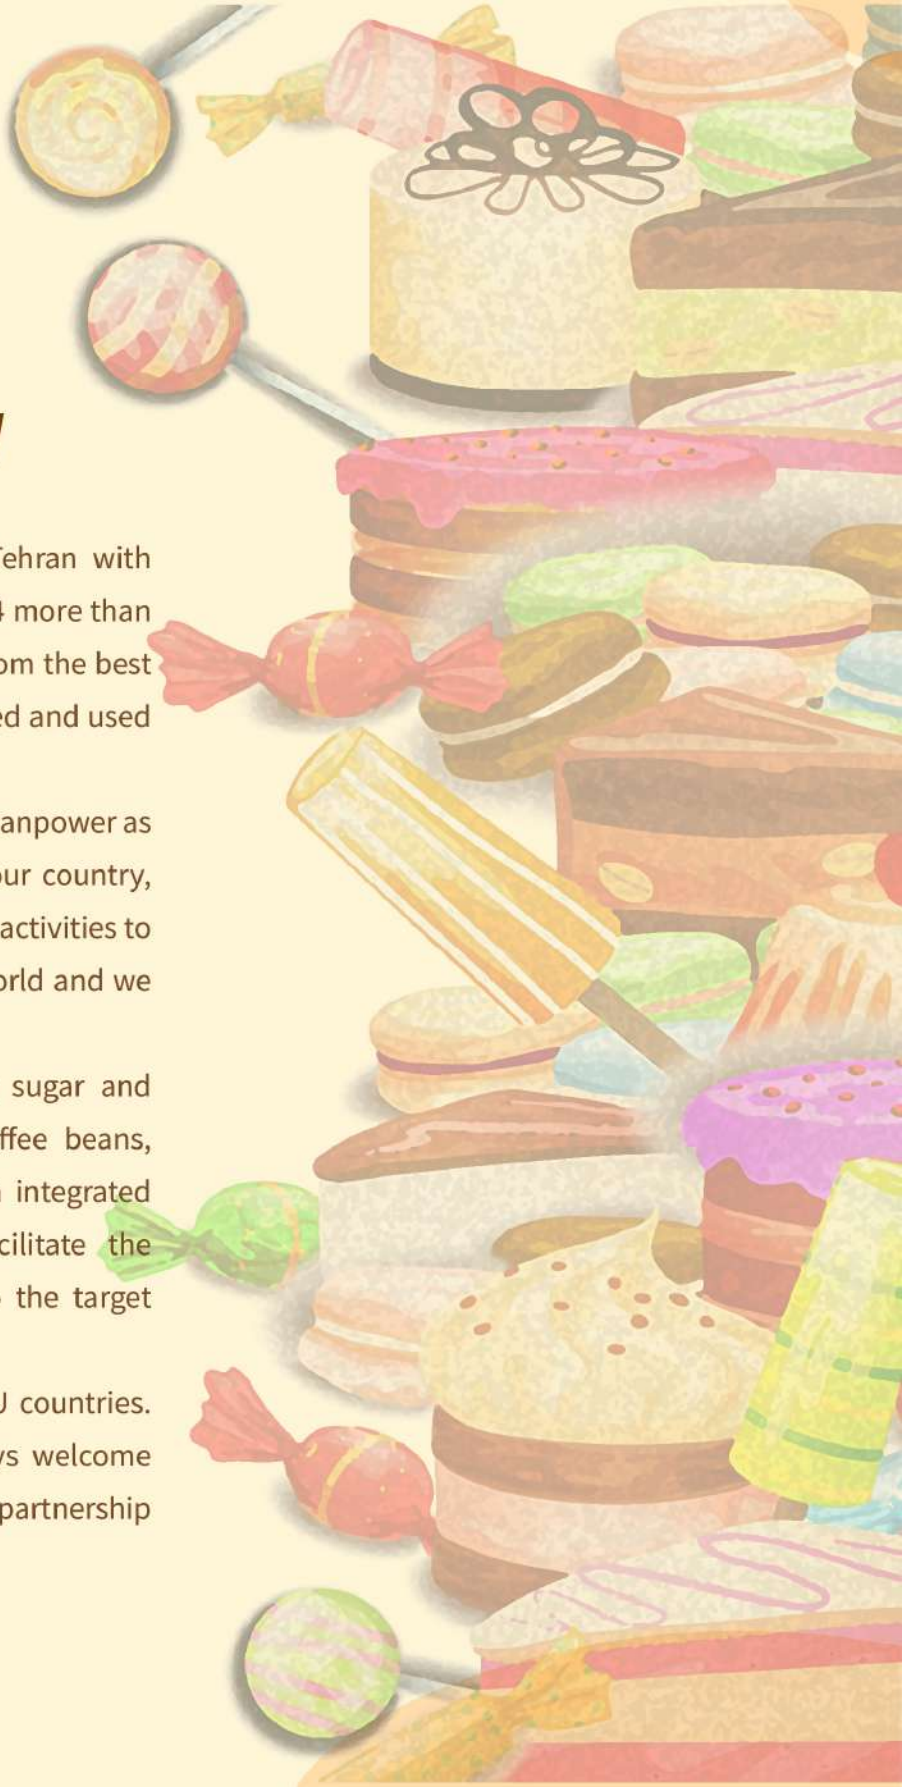

INTRODUCTION

Bahjat products have been registered in Tehran with years of experience in the supply of sweets, 4 more than chocolates, etc., and the sweets produced from the best and highest quality raw materials are supplied and used in the production lines of Iranian factories.

Believing in the potentials and experienced manpower as well as the incredible natural resources in our country, we have expanded the scope of our business activities to export goods to different countries of the world and we have a major focus on this.

In Iran's special sweets and other Iranian sugar and non-sugar products such as chocolate, coffee beans, saffron, etc., our first priority is to form an integrated supply chain management system to facilitate the process from first-class quality products to the target markets.

We always welcome new partners and EAEU countries. From factories to target markets, we always welcome new partners and customers for long-term partnership and cooperation.
